ABOUT ME

I am a Full-Stack Developer with experience in building modern, scalable, and efficient web applications across both frontend and backend. On the frontend, I primarily work with React.js, Next.js, and Tailwind CSS to develop responsive, user-friendly, and high-performance interfaces. On the backend, I use Express.js and Laravel to build robust APIs and handle application logic. I have experience designing RESTful APIs, managing databases such as MySQL and MongoDB, and implementing clean, maintainable architectures. I am passionate about writing high-quality code, continuously improving my skills in software engineering, and leveraging modern web technologies to build reliable and impactful digital solutions.
