Tangerang, Indonesia | +62-896-8689-9447 | raditdwi478@gmail.com

ABOUT ME

I am a Full-Stack Developer with experience in building modern, scalable, and efficient web applications across both frontend and backend. On the frontend, I primarily work with React.js, Next.js, and Tailwind CSS to develop responsive, user-friendly, and high-performance interfaces. On the backend, I use Express.js and Laravel to build robust APIs and handle application logic. I have experience designing RESTful APIs, managing databases such as MySQL and MongoDB, and implementing clean, maintainable architectures. I am passionate about writing high-quality code, continuously improving my skills in software engineering, and leveraging modern web technologies to build reliable and impactful digital solutions.

EDUCATION

BINA SARANA INFORMATIKA UNIVERSITY

Bachelor of Information System

Tangerang

2024 – 2028

WORK EXPERIENCE

BANTUKERJAANMU.COM

Mentor Specialist – Math & Computer Science

Remote

Aug 2025 – Present

- Conducted one-on-one mentoring sessions to help students understand complex concepts in mathematics and computer science.
- Guided students in web development topics, including programming fundamentals, frontend development, and application logic.
- Provided instruction and problem-solving guidance in calculus, including limits, derivatives, and analytical techniques.
- Delivered clear explanations and structured learning strategies to improve students' conceptual understanding.
- Facilitated interactive coding sessions that strengthened logical reasoning and increased student confidence.

PT MORFOGENESIS TEKNOLOGI INDONESIA

Fullstack Developer Internship

Jakarta

Okt 2025 – Jan 2026

Certificate: [\[View\]](#)

- Developed and integrated frontend and backend components to enhance application responsiveness and improve user experience.
- Implemented automated testing frameworks to increase code reliability and reduce post-deployment defects.
- Collaborated with cross-functional teams to align technical solutions with business requirements, optimizing project delivery timelines.
- Refined database schemas and queries to boost data retrieval speed and maintain system scalability.
- Monitored application performance and resolved critical issues to ensure high availability and system stability.

PROJECTS

Authentication & Authorization System [\[View\]](#)

Tech: Express.js | TypeScript | MongoDB | JWT | Google OAuth | Zod

A robust and secure backend API built with Express and TypeScript to handle modern authentication flows and role-based authorization.

- Implemented JWT-based authentication using secure HttpOnly cookies for refresh tokens and JSON payloads for access tokens to prevent client-side token exposure.
- Integrated Google OAuth 2.0 via google-auth-library, enabling seamless single sign-on (SSO) and automatic account creation for verified Google users.
- Established Role-Based Access Control (RBAC) with custom Express middlewares to restrict API access based on 'user' and 'admin' privileges.

3D Portfolio Website [\[View\]](#)

Tech: React | Three.js | TailwindCSS

A stunning, interactive 3D portfolio website built with React, Three.js, and Vite — designed to showcase projects, experience, and skills with immersive visuals and smooth animations.

- Built an immersive 3D experience using React Three Fiber and Drei, rendering interactive 3D models and scenes directly in the browser.
- Designed fluid page transitions and scroll-based animations using the Motion library for a polished, modern user experience.
- Styled the entire interface with Tailwind CSS v4, ensuring a responsive and visually cohesive dark-themed design across all devices.

Employee Management System [\[View\]](#)

Tech: PHP | Laravel | MySQL | TailwindCSS

A comprehensive web-based HR and employee management platform built with Laravel to streamline daily workforce operations.

- Implemented secure session-based authentication with role-based access control (RBAC) supporting Admin, Manager, and Employee roles.
- Developed an attendance system enabling daily check-in and check-out tracking, location logging, and automatic work-hour calculations.
- Integrated a payroll management system that calculates net salaries based on allowances and deductions, and generates digital payslips.

AI Interview Prep Web Application [\[View\]](#)

Tech: React | Express | JavaScript | TailwindCSS

A modern, interactive web application built with Blazor WebAssembly and .NET Core.

- Developed a fully interactive Single Page Application (SPA) using Blazor WebAssembly.
- Implemented API interactions using .NET Core for a robust backend.
- Designed responsive UI components with Tailwind CSS for an enhanced UX.

AI Resume Critiquer [\[View\]](#)

Tech: Python | Git | Streamlit

An AI-powered web application that analyzes resumes and provides tailored, constructive feedback based on targeted job roles.

- Integrated Groq API with the Llama 3.1 model for high-speed, expert-level resume evaluation.
- Implemented PDF and TXT file parsers utilizing PyPDF2 to extract resume content.
- Designed dynamic AI prompts focusing on content clarity, skills presentation, and job alignment.

EduTrack [\[View\]](#)

Tech: React | Express | MySQL | TailwindCSS

A robust learning log platform enabling students to track daily activities and allowing teachers to monitor progress and provide feedback.

- Designed a responsive and intuitive frontend with React, React Router DOM, and Tailwind CSS for cross-device accessibility.
- Developed a secure backend REST API utilizing Node.js and Express, handling all application logic and routing.
- Implemented role-based access control with JWT authentication and bcrypt password hashing to distinguish between student and teacher features.

NutriStunting [\[View\]](#)

Tech: React | Express | MySQL | TailwindCSS

A robust learning log platform enabling students to track daily activities and allowing teachers to monitor progress and provide feedback.

- Designed a responsive and intuitive frontend with React, React Router DOM, and Tailwind CSS for cross-device accessibility.
- Developed a secure backend REST API utilizing Node.js and Express, handling all application logic and routing.
- Implemented role-based access control with JWT authentication and bcrypt password hashing to distinguish between student and teacher features.

Hilink [\[View\]](#)

Tech: Next.js | React | TypeScript | TailwindCSS

A premium, highly responsive landing page for an outdoor adventure and camping application, designed to showcase travel navigation, camping listings, and scheduling features for hikers.

- Built a modern and interactive user interface using Next.js (App Router), React, and TypeScript for optimized web performance.
- Created modular and reusable UI components, including dynamic campsite lists, a detailed route guidance interface, and app store call-to-actions.
- Designed clean and eye-catching layouts with Tailwind CSS, utilizing custom configurations, smooth spacing, and mobile-first responsiveness.

VirtualIR [\[View\]](#)

Tech: React | Vite | Tailwind CSS | JavaScript | Lucide React

A modern landing page and build tool platform for Virtual Reality developers, designed to streamline VR application development, testing, and collaboration.

- Built with React 19 and Vite as the primary development framework and bundler using modern JavaScript (ES Modules).
- Styled using Tailwind CSS v4 featuring responsive flex/grid layouts, eye-catching gradients, and a sleek dark theme aesthetic.
- Architected with a modular, component-driven frontend including dedicated components for Hero, Features, Workflow, Pricing, Testimonials, and Footer.

Monks Estate [\[View\]](#)

Tech: *React | Vite | TailwindCSS | DaisyUI*

A modern and premium real estate landing page designed to showcase property listings, agent services, client testimonials, and industry insights with a clean, elegant aesthetic.

- Designed and developed a fully responsive web interface using React and Vite for fast load times and smooth rendering.
- Styled a premium UI using Tailwind CSS and DaisyUI, implementing custom color schemes, typography, hover animations, and a cohesive design system.
- Integrated mobile-responsive side navigation drawer, newsletter subscription form, and social media integration in the footer.

Simple E-Commerce with Stripe [\[View\]](#)

Tech: *Next.js | Stripe | Zustand | TailwindCSS | TypeScript*

A modern and responsive e-commerce web application built using Next.js and Stripe, featuring a dynamic shopping cart, product detail pages, and a seamless checkout experience.

- Developed a persistent and global shopping cart state management leveraging Zustand with local storage persistence middleware.
- Integrated Stripe API on the server side to dynamically fetch, list, and display products and prices from the Stripe Dashboard.
- Implemented secure Stripe Checkout flows by utilizing Next.js Server Actions to safely create and redirect users to payment sessions.

FavLib [\[View\]](#)

Tech: *React | TailwindCSS | Node.js | Express | MongoDB | Zustand*

A responsive full-stack book cataloging and sharing web application that allows users to discover new reads, search books, and share personal reviews along with purchase links.

- Developed a secure RESTful API using Express.js and Mongoose to handle book catalog records, search queries, and reviews.
- Implemented secure JWT user authentication with HTTP-only cookies and Bcrypt password hashing.
- Integrated Cloudinary API to manage cloud-based storage and dynamic uploading of book cover images.

ExpenseTracker AI [\[View\]](#)

Tech: *Next.js | Prisma | PostgreSQL | TailwindCSS | Clerk*

A modern, AI-powered financial companion and expense tracking web application that allows users to seamlessly log transactions, analyze budgets with interactive charts, and receive tailored financial advice.

- Designed a highly responsive and interactive dashboard with Next.js App Router, Tailwind CSS, and Chart.js for real-time spending visualization.
- Developed robust transaction CRUD functionalities leveraging secure Next.js Server Actions and Prisma ORM.
- Implemented an AI-driven financial advisor using OpenAI (via OpenRouter/DeepSeek) to automatically categorize expenses and answer questions about budgets.
